

SkillsUSA Kansas Urban SAR Robotics Competition

Notes from the Chair, 4/17/2024

Schedule for the upcoming Event on 4/25/2024. The times listed are estimated; if scheduled events complete early, we will move to the next event in sequence.

8:00 AM Team and Judges Meeting—Event Overview.

8:30 AM Technical Presentation and Engineering Notebook Review.

9:00 AM Skill Challenges 1 through 5. Note: some field configuration and structure staging will be needed between some of the Challenges.

11:00 AM Field Challenge.

11:30 AM Event Wrap-up and Debriefing.

12:00 PM Team and Course pack-up (or wait until after lunch).

Additional Notes

Because we are introducing the Skill Challenges this year, it is not known if the two hour period will be adequate to complete them. Some flexibility may be needed on this schedule. It may be necessary to move the final Field Challenge to after lunch. As things progress in the morning, I will be monitoring the time in case adjustments need to be made. The Team and the Judges will be able to provide input prior to any schedule adjustments.

The final Field Challenge will be utilizing the legacy course from prior Events. Photos are being provided of the layout. Skill Challenges will be very close to those diagrammed in the National Standard.

Thank you and if you have any questions, please contact me or Becky Warren. We will make every effort to answer to your satisfaction.
